

PROJECT PROPOSAL

OpenEd Inc. → Academy

Optio Learning Management Platform Integration

Version: 1.0 **Date:** April 30, 2026 **Prepared For:** Optio Education

1. Executive Summary

OpenEd Academy (OEA) is seeking a strategic technology partner to build and maintain a Learning Management System (LMS) that bridges the OpenEd marketplace and the day-to-day academic experience for families enrolled in the OpenEd Academy instance of OpenEd Inc.

The platform must replicate the core functions of a traditional school's LMS — including course enrollment, assignment submission, grading, progress tracking, and teacher-to-family communication — while accommodating the unique model of an academy where parents play a central role and curriculum often originates outside the platform.

Optio will serve as the operational backbone of OEA's academic experience: the place where learning is recorded, feedback is delivered, progress is reviewed, and transcripts are generated.

2. Goals

- Seamless family enrollment – Enrollment should involve minimal parent tasks outside of the OpenEd platform.
- Seamless course enrollment – purchasing a course in the OpenEd marketplace automatically creates the corresponding quest in Optio with no additional parent action required.
 - **The ideal:** a purchase in the Marketplace triggers the assignment of the equivalent Optio quest for the student.
 - **MVP:** a way to batch enroll with some admin or automation process on a regular cadence.
- Role-appropriate access – families, OpenEd homeroom teachers, academic counselors, and admin staff each have clearly defined capabilities and visibility within the platform.
- Role-appropriate tasks & efficiency – Each role (defined in section 3) can perform their tasks without leaving the Optio platform:
- Clear progress visibility – families can easily track progress, grades, and feedback for all children on a single dashboard
- Staff efficiency – teachers can grade, provide feedback, mark
- Minimal duplication – parents should never be required to perform the same action in both the OpenEd platform and in Optio
- Pathway Tracking – students who opt into an Optio academic pathway have their progress displayed clearly alongside standard quest progression.
- Reliable tech support – clear expectations of where to take questions and where to get training

3. User Roles

The following roles must be supported within the Optio platform, each with distinct permissions and views:

Role	Description	Key Permissions
Family (Parent)	Views progress, submits artifacts, views grades and feedback, communicates with homeroom teacher	Submit work; view grades/feedback; view all children; interact with homeroom teacher (NOT graders)
OEA Student	Dependent managed by parent; completes quests/courses, earns credit toward pathway	Managed by parent account; no independent login required unless specified
Homeroom Teacher	Reviews and grades some quest submissions, marks some quests complete, leaves feedback, communicates with families	Grade submissions; mark quests complete (ready for credit evaluation); leave feedback; view all artifacts/uploads; use Optio data for learning log check-ins
Academic Counselor	Manages student pathways, awards credit, generates transcripts, reviews grades and progress	View all grades/feedback; change Optio pathway; award credit to completed quests; download transcripts; create report cards
Admin	Loads graded platform data into Optio on behalf of parents; manages backend operations	Import/sync data from external graded platforms into Optio on parent's behalf; full platform access
Optio Support	Provides technical support for platform	Existing support role; platform-level issue resolution

4. Feature Requirements

4.1 Student Enrollment

Description: When a family enrolls in OpenEd Inc. for the OEA program, they should be able to have an Optio account created with minimal extra steps. This account should automatically link all students under the same parent as a family.

Mechanism:

- Match students to appropriate families

What the parent should NOT have to do:

- Sign up for Optio with many extra steps.

4.2 Marketplace-to-Platform Enrollment Automation

Description: When a family purchases a course or program through the OpenEd marketplace, that course must automatically appear as an active quest in Optio. No additional enrollment action should be required from the **parent**.

Mechanism:

- Purchase in the OpenEd marketplace triggers automatic quest creation in Optio from a selection of templates (**ideal**)
- Data can be exported from OpenEd platform to batch enroll students in Optio classes on a regular cadence (**MVP**)
- Student is enrolled in the corresponding Optio quest without **parent** re-entry
- Students are only enrolled in templated Optio quests
- Families receive confirmation within Optio that the new course is ready

What the parent should NOT have to do:

- Manually re-enroll their child in Optio after purchasing
- Enter course details that were already captured at point of sale

4.3 Role-Based Access and Permissions

Description: The platform must enforce distinct permissions for each role so that users can only take actions appropriate to their role.

Family Capabilities

- View all quests and course progress for each child
- Submit artifacts (assignments, portfolio items, evidence of learning)
- View grades and feedback from graders and homeroom teachers
- Communicate with homeroom teacher (not with graders directly)
- View progress along Optio pathway (if selected)

What Families Must NOT Be Able To Do

- Grade their own student's assignments
- Mark a course or quest complete independently
- Award credit
- Modify academic records

Homeroom Teacher Capabilities

- Grade quest submissions
- Mark quests as complete and ready for credit evaluation
- View all student submissions, artifacts, and uploads
- Leave qualitative and quantitative feedback
- Communicate with families through the platform
- Access Optio data (progress, logs) to inform learning log feedback and check-in calls

Academic Counselor Capabilities

- View all grades and feedback across students
- View and modify student Optio pathway selection
- Award credit to completed quests
- Download and generate student transcripts and report cards (**ideal**)
- Download data to generate student transcripts and report cards by manually (**MVP**)

Admin Capabilities

- Import and sync grade data from external graded platforms into Optio on behalf of parents
- Standard Admin capabilities

4.4 Course and Quest Progress Display

Description: Families must be able to clearly see the status of all active courses and quests for every child in their account.

Required display elements:

- Overall completion percentage per course/quest
 - Grades and feedback received for each submission
 - Due dates for upcoming tasks (staff-adjustable, not parent-adjustable)
 - Status indicators: Not Started / In Progress / Submitted / Graded / Complete
 - Easy navigation between multiple children in a single family account
 - Progress along selected Optio pathway (if applicable) displayed alongside course progress
 - Communicate how credits from the Marketplace convert to XP points in Optio.
- 1,000 XP = 1 semester class = 0.5 credits

Due Date Management:

- Due dates must be visible to families
- Only staff members (not parents) may modify due dates

4.5 Assignment Submission and Artifact Management

Description: Families submit student work through Optio. The platform must support a variety of submission formats and organize submissions by course and student.

Acceptable submission formats:

- Documents (PDF, Word, etc.)
- Images
- Video files or links
- Audio recordings
- Links to external work or portfolios
- Text entries

Submission rules:

- Each submission is associated with the relevant quest/course and student
- Parents may only submit -- they may not grade or approve their own submissions
- Submitted artifacts are visible to homeroom teachers and academic counselors

4.6 Grading and Feedback Workflow

Description: Homeroom teachers grade submissions and leave feedback within Optio. The grading workflow must be efficient and clearly organized.

Teacher Grading View

- View all pending submissions across assigned students
- Open and review submitted artifacts in-platform

- Assign a grade (format TBD -- numeric, letter, or rubric-based)
- Leave written feedback visible to the family
- Mark a quest as complete and ready for credit evaluation by the academic counselor

Academic Counselor Credit Award

- Reviews quests flagged as complete by homeroom teachers
- Formally awards credit, triggering progression in the student's academic record
- Counselor action is the authoritative completion step -- teacher flags, counselor awards

Grade and Feedback Visibility

- Grades and feedback are visible to families immediately upon teacher submission
- Families can view a full history of grades and feedback per course and per student

4.7 Teacher-Family Communication

Description: Homeroom teachers and families must be able to communicate directly through the platform. This channel is distinct from grading and feedback.

- Direct messaging between families and their assigned homeroom teacher
- Communication history is logged and accessible to the teacher and family
- Optio support (not OEA staff) handles platform-related issues via tech support email : support@optioeducation.com

4.8 Optio Pathway Integration

Description: OEA may offer students the option to pursue a structured Optio academic pathway. The platform must support pathway selection and display pathway progress alongside standard course tracking.

- Families can opt a student into an Optio pathway
- Pathway progress is displayed separately but accessibly within the student dashboard
- Academic counselors can view, adjust, and manage pathway enrollment change requests
- Pathway completion data feeds into transcript generation

4.9 External Platform Data Integration

Description: Some OEA courses are graded or managed on external platforms (e.g., ALEKS, IXL, and other online tools). Admin staff must be able to load this grade and progress data into Optio on behalf of families.

- Admin can import grade and completion data from external graded platforms
- Data is attributed to the correct student and course within Optio
- Families can view externally-sourced grades alongside native Optio grades
- Parents are not required to re-enter data already available on external platforms

Physical curriculum, experiences, and paper-and-pencil activities:

- Parents submit evidence of completion (photos, scans, teacher attestation) through Optio's artifact submission workflow
- Homeroom teacher reviews and grades physical work submissions

4.10 Transcripts and Report Cards

Description: Academic transcripts and report cards are generated from data within Optio.

Transcript Contents

- Student name and identifying information
- Credits earned by subject area with completion dates and grades
- Credits in progress
- Optio pathway enrollment and completion status (if applicable)
- OEA program affiliation

Report Cards

- Generated by academic counselors using Optio data
- Reflect grades, feedback, and progress for a defined grading period

Availability

- Academic counselors can generate and download transcripts for any enrolled student
- Format options: PDF (printable) and HTML (web view)

4.11 Teacher Training Resources

Description: Homeroom teachers must have access to training materials directly within the Optio platform.

- Training resources available natively from within Optio (not requiring external navigation)
- Content covers grading workflow, feedback best practices, platform navigation, and family communication
- Resources are accessible at any time, not just during onboarding

4.12 Tech Support

Description: OEA families and staff have a clear channel for platform-related technical support.

Scope of Optio Support:

- Account access issues (password resets, login problems)
- Platform errors (broken features, submission failures)
- Navigation help
- Bug reports and resolution

Out of Scope (handled by OEA directly):

- Curriculum questions or academic guidance
- OpenEd marketplace issues
- Enrollment, billing, or program questions

Support channel: Email support at support@optioeducation.com

5. Platform Constraints

The following constraints are non-negotiable requirements for the platform:

Constraint	Rationale
Parents cannot grade their student's own assignments	Maintains academic integrity; grading is a staff function
Parents cannot mark a course or quest complete	Completion is determined by teacher and counselor review
Parents cannot award credit	Credit award is an academic counselor authority
Parents cannot modify due dates	Due dates are set and adjusted by staff only
Parents must not be required to duplicate actions taken in the OpenEd marketplace	Enrollment automation eliminates redundant data entry
Parents do not communicate directly with graders	All family communication routes through homeroom teachers

6. Open Questions

The following items require resolution before full development scope can be confirmed:

#	Question	Notes
1	Grading scale format	Will teachers use letter grades, numeric scores, rubric-based assessments, or a combination?
2	Student login accounts	Do OEA students require their own login credentials, or are all actions taken through the parent account?
3	External platform integrations	Which specific external graded platforms (ALEKS, IXL, etc.) need to be supported for admin data import, and what data formats do they export?
4	Pathway details	What are the specific Optio pathway options available to OEA students, and what are the credit requirements per pathway?
5	Report card format	What data fields and period structure are required for OEA report cards?
6	GPA calculation	Is GPA calculated within Optio, and if so, what scale and weighting rules apply?
7	Launch timeline	What is the target go-live date, and what is the expected student enrollment volume in Year 1?
8	Teacher account provisioning	How are homeroom teachers assigned to students and families? Is this a manual admin process or automated by enrollment?

7. Program Parameters

Parameter	Value / Notes
User Roles Required	Family, Homeroom Teacher, Academic Counselor, Admin, Optio Support
Enrollment Trigger	Marketplace purchase → automatic Optio quest creation (no parent re-entry)
Submission Formats	Documents, images, video, audio, links, text entries
Grading Authority	Homeroom Teachers (grade); Academic Counselors (award credit)
Communication Channel	Families ↔ Homeroom Teacher only (not graders)
Due Date Management	Staff-controlled; parents view only
Transcript Output	PDF and HTML; generated by Academic Counselor
External Data Import	Admin imports external platform grades on parent's behalf
Teacher Training	Available natively within Optio platform
Tech Support Channel	support@optioeducation.com (Optio handles platform issues; OEA handles academic/program issues)

8. Assumptions

- All OEA students are minors managed through a parent account (COPPA/FERPA compliant)
- Graders and homeroom teachers may be the same individual or different people; the platform must support both configurations
- The OpenEd marketplace is the authoritative source for course enrollment; Optio does not manage billing or course sales
- Optio handles the platform and academic record layer; OEA handles diploma/certificate certification and issuance
- Parents are responsible for submitting evidence of physical curriculum completion; the platform facilitates submission but does not originate physical curriculum
- Admin staff will manage the data import process from external platforms; this is not automated in the initial build unless otherwise scoped
- Teacher training content will be provided by OEA or developed collaboratively; Optio provides the hosting layer within the platform

9. Timeline

Description	Finish Date for Testing	Drop-dead Date	Roles involved
Teacher Training/Onboarding			

First day of school			
Marketplace opens for purchases
