

# PRD V2: Optio <> OEA

**Version:** 2.0 **Date:** March 11, 2026

---

## 1. Executive Summary

This document outlines the proposed integration between Optio and OpenEd Academy (OEA) to support the OEA Diploma Plan Program. Parents will enroll through the OpenEd marketplace, select one of three diploma pathways, and use Optio to track credit progress, upload portfolio evidence, and ultimately earn an OEA diploma upon completion of all pathway requirements.

Optio serves as the credit-tracking, learning log, and portfolio layer for diploma completion.

---

## 2. Goals

1. **Seamless enrollment** -- Parents click through from the OpenEd marketplace tile and land on an OEA-branded Optio signup flow
2. **Diploma pathway selection** -- Parents choose from three structured pathways that define their credit requirements
3. **Lightweight progress tracking** -- Learning logs in Optio as primary progress documentation
4. **Portfolio-integrated learning logs** -- Logs completed in Optio become portfolio entries automatically
5. **Oversight without friction** -- OEA staff have read-only admin visibility into enrolled families
6. **Transcript and diploma delivery** -- Academic transcripts available on request; OEA diploma awarded upon pathway completion

---

### 3. User Roles

| Role                         | Description                                                                                     | Optio Mapping                                |
|------------------------------|-------------------------------------------------------------------------------------------------|----------------------------------------------|
| <b>OEA Parent</b>            | Enrolls family, selects pathway, manages credit progress, uploads evidence                      | parent (platform user) with OEA program flag |
| <b>OEA Student</b>           | Dependent managed by parent; earns credits toward diploma                                       | student (dependent, managed by parent)       |
| <b>OEA Staff (Oversight)</b> | OpenEd employees who monitor enrollment and progress but do not interact with families directly | observer with elevated read-only dashboard   |
| <b>Optio Support</b>         | Handles Level 1 tech support (platform errors, account issues)                                  | Existing support role                        |

---

### 4. Feature Requirements

#### 4.1 Account Provisioning via Marketplace

**Description:** Parents arriving from the OpenEd marketplace tile are directed to an Optio signup page that automatically associates their account with the OEA Diploma Plan Program.

**Mechanism:**

- The marketplace tile links to Optio's signup URL with a partner key parameter (e.g., <https://www.optioeducation.com/signup?partner=opened-academy>)

- The signup page detects the partner key and:
  - Displays OEA-specific branding/welcome messaging
  - Tags the new account as an OEA Diploma Plan participant
  - Skips or simplifies any steps not relevant to OEA families
- After account creation, the parent is guided into the diploma pathway selection flow (Section 4.2)

**No SSO required.** Parents create a standard Optio account. The partner key simply ensures the account is flagged for the OEA program.

**What the parent sees:**

1. Clicks "Optio" tile on OpenEd marketplace
  2. Lands on Optio signup page with OEA context messaging
  3. Creates account (email, password, family info)
  4. Immediately enters pathway selection (Section 4.2)
- 

## 4.2 Diploma Plan Pathway Selection

**Description:** After signup, parents select one of three diploma pathways. The chosen pathway defines the credit framework their student(s) will work toward.

**Pathway 1: Open and Balanced**

*12 Foundation Credits + 12 Elective Credits = 24 Total*

| Category   | Subject        | Credits |
|------------|----------------|---------|
| Foundation | Math           | 3       |
| Foundation | Language Arts  | 3       |
| Foundation | Science        | 3       |
| Foundation | Social Studies | 3       |

|          |                |    |
|----------|----------------|----|
| Elective | Student Choice | 12 |
|----------|----------------|----|

**Character:** Maximum flexibility. Students choose all 12 electives freely.

### Pathway 2: Traditionally Aligned

*13 Foundation Credits + 11 Elective Credits = 24 Total*

| Category   | Subject            | Credits |
|------------|--------------------|---------|
| Foundation | Language Arts      | 4       |
| Foundation | Math               | 3       |
| Foundation | Science            | 3       |
| Foundation | Social Studies     | 3       |
| Elective   | The Arts           | 2       |
| Elective   | Health & PE        | 2       |
| Elective   | CTE                | 1       |
| Elective   | Financial Literacy | 1       |
| Elective   | Student Choice     | 5       |

**Character:** Mirrors a conventional high school structure with recommended elective categories.

### Pathway 3: College Bound

*19 Foundation Credits + 5 Elective Credits = 24 Total*

| Category   | Subject        | Credits |
|------------|----------------|---------|
| Foundation | Language Arts  | 4       |
| Foundation | Math           | 4       |
| Foundation | Science        | 3       |
| Foundation | Social Studies | 3       |
| Foundation | World Language | 2       |
| Foundation | Student Choice | 3       |
| Elective   | Student Choice | 5       |

**Character:** Heaviest foundation load aligned with college admissions expectations. OEA recommends aligning course selection with the colleges and universities the student is interested in attending.

### **Pathway Selection UX**

- Presented as a clear comparison view (card layout or side-by-side)
- Each pathway shows total credits, foundation vs. elective split, and a short description of who it's best for
- Parent selects pathway for each student individually (siblings may choose different pathways)
- Pathway can be changed at any time by the parent with no approval required. It is the parent's responsibility to ensure their student meets the requirements of the selected pathway

---

## 4.3 OEA Staff Oversight Accounts

**Description:** Designated OpenEd staff receive observer-level accounts that provide read-only visibility into all OEA-enrolled families.

**Capabilities:**

- View list of all enrolled OEA families and their chosen pathways
- View credit progress for any OEA student
- View uploaded portfolio evidence
- View transcript data
- Cannot modify student data, approve tasks, or interact with families directly

**Provisioning:** Optio creates these accounts upon OEA request. Staff accounts are flagged as OEA oversight and automatically linked to all OEA-enrolled students.

**Dashboard:** A dedicated OEA oversight view showing:

- Enrollment summary (total families, pathway distribution)
- Progress overview (students by completion percentage)
- Ability to drill into individual student progress

---

## 4.4 Progress Tracking

**Description:** Parents track their student's credit progress in Optio through learning logs (Section 4.5) and evidence uploads.

**Evidence Uploads:**

- Acceptable formats: documents, images, videos, links, text entries
- Each upload is associated with a specific credit/subject area

**What Counts as Progress:**

- Learning logs completed in Optio (see Section 4.5)

- Work samples, project documentation, test results
- External course completions or certificates
- Any evidence that demonstrates credit-level learning

#### **Credit Completion and Grading:**

- **Parent self-attestation** -- Parents mark credits as complete based on their student's work
  - Upon marking a credit complete, the parent reports a **course grade (A-F)** for that credit
    - If home-taught: parent assigns the grade they awarded
    - If using outside curriculum: parent enters the grade assigned by the external provider
  - **Honors/AP/IB weighting** -- Parents can check a box indicating "This is an honors, IB, or AP course and should be weighted" to apply additional GPA weight
  - Optio calculates the student's **cumulative GPA** from all reported course grades, applying standard weighting (unweighted and weighted GPA displayed)
  - OEA staff can review progress and grades via their oversight dashboard but do not approve individual credits
  - This keeps the workflow lightweight and consistent with the homeschool model where parents are the primary educators
- 

## **4.5 Learning Logs in Optio**

**Description:** Parents complete learning logs directly within Optio. These logs serve as progress documentation for the OEA Diploma Plan and are automatically included in the student's portfolio. Parents are expected to report at least quarterly on progress in each course.

#### **Weekly Learning Log Entry:**

Each week, parents submit a learning log with the following fields:

| Field | Description | Required |
|-------|-------------|----------|
|-------|-------------|----------|

---

|                         |                                                                                                                                              |                  |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------|------------------|
| <b>Diploma subjects</b> | Parent selects which diploma subjects were worked on this week (multi-select from their pathway's subject list)                              | Yes              |
| <b>Reflection</b>       | 3–5 sentence reflection on the week related to any subject area or competency                                                                | Yes              |
| <b>Format</b>           | Reflection can be submitted as: written text, oral recording (audio/video), link to external document or video, or file upload (up to 20 MB) | Yes (one format) |

### Quarterly Summary:

Parents submit a quarterly summary log that consolidates progress for that period:

- Summary of weekly logs submitted during the quarter
- Overall progress narrative per course
- Parents may copy/paste from their OpenEd platform logs or write an original summary

### Submission Cadence:

- **Weekly:** Learning log entries (subject selection + reflection)
- **Quarterly (minimum):** Progress summary per course. Parents who submit weekly logs can generate a quarterly summary from those entries

**Portfolio Display:** Learning logs appear in the student portfolio as entries showing:

- Subjects worked on, reflection content, and any attached evidence
- Automatically tagged as part of the OEA Diploma Plan
- Organized chronologically with quarterly summaries highlighted

## 4.6 Parent Credit Management Dashboard

**Description:** Parents see a dedicated dashboard view for managing their student's progress toward the selected diploma pathway.

**Dashboard Elements:**

- **Pathway overview** -- Visual progress bar showing credits earned vs. required (e.g., "8 of 24 credits completed")
- **Credit breakdown by category** -- Foundation vs. elective progress, broken down by subject area
- **Subject detail view** -- For each subject (e.g., "Math -- 2 of 3 credits"), view associated tasks, evidence, and completion status
- **Progress log** -- Timeline view of uploads and learning log entries
- **Annual metrics** -- 6 credits per year target pace (6 courses/year x 4 years = 24 credits), with year-over-year progress toward diploma completion

**Task Management:**

- Parents create tasks representing credit-earning activities
  - Tasks are tagged to a subject/credit area
  - Completing tasks contributes XP toward credit thresholds
  - When a credit's XP threshold is met, the credit is marked as earned
- 

## 4.7 Transcripts

**Description:** Academic transcripts generated from Optio are available upon request.

**Transcript Contents:**

- Student name and identifying information
- Selected diploma pathway
- Credits earned by subject area with completion dates and letter grades (A-F)
- Credits in progress
- Cumulative GPA (unweighted and weighted)
- Honors/AP/IB designation noted for weighted courses
- OEA program affiliation noted on transcript

**GPA Calculation:**

- Standard 4.0 scale: A=4.0, B=3.0, C=2.0, D=1.0, F=0.0

- Weighted GPA adds +1.0 for courses marked as honors/AP/IB (e.g., an A in an AP course = 5.0)
- Both unweighted and weighted GPA displayed on transcript
- GPA calculated automatically from parent-reported course grades

**Availability:**

- Parents can generate and download transcripts from their dashboard at any time
  - OEA staff can generate transcripts for any enrolled student via oversight dashboard
  - Format options: PDF (printable), HTML (web view)
- 

## 4.8 OEA Diploma Completion

**Description:** When a student completes all credit requirements for their chosen pathway, they are eligible for the OEA diploma.

**Completion Criteria:**

- All 24 credits earned (per pathway-specific requirements)
- All foundation credit requirements met
- All elective credit requirements met (including any pathway-specific categories)

**Completion Flow:**

1. System detects all pathway credits are fulfilled
2. Student's status changes to "Diploma Requirements Met"
3. OEA staff are notified via oversight dashboard
4. OEA performs final review/verification
5. OEA awards diploma (OEA's process, outside Optio)
6. Optio records diploma as issued and updates student portfolio

**Diploma Record in Optio:**

- Diploma status displayed on student profile and portfolio
- Issued date, pathway completed, and OEA affiliation recorded
- Public portfolio (if enabled) reflects diploma achievement

**NOTE:** The diploma itself is awarded by OEA, not Optio. Optio's role is tracking progress toward completion and recording the diploma once OEA confirms it has been awarded.

---

## 4.9 Level 1 Tech Support

**Description:** Optio provides Level 1 technical support for OEA families using the platform.

**Scope:**

- Account access issues (password resets, login problems)
- Platform errors ("I get an error when I try to XYZ")
- Navigation help ("How do I upload evidence?")
- Bug reports and resolution

**Out of Scope (handled by OEA):**

- Diploma pathway guidance ("Which pathway should I choose?")
- Curriculum questions ("Does this count as a Science credit?")
- OpenEd platform issues
- Enrollment/billing for the OEA program

**Support Channel:** Email support at **support@optioeducation.com**. OEA families contact Optio directly for platform issues.

---

## 5. Resolved Questions

| Question                   | Resolution                                                                                                                                                  |
|----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Learning log fields</b> | Weekly: select subjects worked on + 3-5 sentence reflection (written, oral, link, or 20 MB upload). Quarterly summary required at minimum. See Section 4.5. |

---

|                               |                                                                                                                                                       |
|-------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Grading standard</b>       | Parent-reported letter grades (A-F) per completed course. Honors/AP/IB weighting option. Optio calculates unweighted + weighted GPA. See Section 4.4. |
| <b>Pathway changes</b>        | Yes, no approval required. Parent's responsibility to ensure pathway requirements are met.                                                            |
| <b>Multi-student families</b> | Yes, siblings can be on different pathways.                                                                                                           |
| <b>Annual metrics</b>         | 6 courses per year x 4 years = 24 credits.                                                                                                            |
| <b>Timeline</b>               | August 1, 2026 launch.                                                                                                                                |
| <b>Volume</b>                 | Estimated 150 students during 2026-27. Majority of enrollment expected early in fall enrollment period.                                               |

## 6. Program Parameters

| Parameter            | Value                                                  |
|----------------------|--------------------------------------------------------|
| <b>Launch date</b>   | August 1, 2026                                         |
| <b>Year 1 volume</b> | ~150 students (2026-27), bulk enrollment in fall       |
| <b>Credit pace</b>   | 6 courses/year x 4 years = 24 credits                  |
| <b>Grading</b>       | Parent-reported A-F with honors/AP/IB weighting option |
| <b>GPA</b>           | Calculated by Optio (unweighted + weighted)            |

---

## 7. Assumptions

1. All OEA diploma students are minors managed by a parent account (COPPA/FERPA compliant)
2. Each student is on exactly one diploma pathway at a time
3. All three pathways require 24 total credits
4. One credit = one full course equivalent (one completed course = one credit)
5. The OEA program operates as a partnership, not an Optio organization -- OEA families are platform users with a program tag, not org-managed users
6. Optio handles the platform; OEA handles the diploma certification
7. Parents are the authoritative source for course grades and pathway selection
8. Standard GPA weighting: +1.0 for honors/AP/IB courses on a 4.0 scale
